PCD FOUNDATION

20th Anniversary Celebration

Sponsorship Opportunities

Friday, November 11, 2022 Chicago, Illinois

This year marks the 20th anniversary of the PCD Foundation (PCDF). With the support of philanthropy and many incredible people, PCDF is celebrating two decades of work to expand programs and support initiatives focused on finding a cure for primary ciliary dyskinesia (PCD).

To celebrate this milestone, we will be gathering at the Chicago History Museum on Friday, November 11, 2022 for the PCD Foundation's 20th Anniversary Celebration. The evening will feature the advances made in rare disease medicine and science and honor the investment and impact of the PCD community.

Your presence and support would be an important addition to this year's event as we raise funds to expand existing clinical care and research networks, provide education, and aid in prioritizing and accelerating research leading to improved diagnosis and treatment for PCD.

We invite you to join us in celebrating our shared success over the last two decades, as we come together in support of our ambitious plans for the future.

PCD Foundation's 15th Anniversary Celebration

PCD Foundation 20th Anniversary Celebration

Why Sponsor?

Sponsoring the PCD Foundation's 20th Anniversary Celebration is a powerful way to associate with the mission of the PCD Foundation.

Your support demonstrates your commitment to the health and well-being of PCD patients and their families, and your investment in advancing research for a brighter future.

Sponsors will be included in PCDF's promotion of the event to its extensive network of world-class physicians, research and treatment centers and PCD patient community. Additional exposure will also be available the evening of the event to an audience of 300+ individuals.

Interested in supporting the event in additional ways? Individual tickets and tables (10 seats plus recognition) are also available.

About PCD Foundation

The PCD Foundation was founded by a PCD parent and a PCD patient in 2002. As a patient-focused organization, the goal of the PCD Foundation is to provide the leadership and resources needed to support increased research, accelerated diagnosis, improved health, and ultimately, a cure for PCD.

The PCD Foundation has developed the PCD Foundation Clinical & Research Centers Network (PCDF - CRCN) to serve as focal points for PCD diagnosis, research, treatment, and data collection. This network ensures that PCD patients receive quality diagnostics and cutting-edge treatment and care, all based on evidence and/or expert consensus. At participating PCDF - CRCN sites, patients may have the opportunity to enroll in the PCD Foundation Registry (PCDFR), which collects important health and demographic information about individuals with PCD. This information is used to assist healthcare teams to provide care to individuals with PCD, drive quality improvement initiatives at care centers, and create PCD care guidelines. Researchers may also use information from the PCDFR to study PCD treatments and outcomes and to design PCD clinical trials.
